## PowerForms

Create custom PowerPoint decks in seconds.

## Create custom presentations in seconds.

With PowerForms, you can customize a presentation in seconds not hours by reusing text from previous presentations, entering new text without worrying about messing up your presentation and focusing solely on the task at hand - modifying the text of your presentation.

Software development proposal for [Client name]

## Focus on what needs changing.

PowerForms let's you skip the wasted steps of navigating slide-by-slide through a presentation only to get at the bits that change. What's more, you'll never have another slide in the middle of your presentation you forgot to customize.

Field	Value	Count
1 Client name	[Client name]	1

8 Project requirements	[Project requirements]	1

## Treat a presentation like a template.

PowerForms makes it fast and easy to take a presentation you've done for one prospective client or customer and turn it into a template you can reuse and modify.

## Not just AV presentations.

PowerForms is not just for presentations: any PowerPoint file - sales report, sales brochure, whatever you have - can be converted into a powerful, reusable PowerForms template.
