PowerTOC

Create summary agendas for your presentations with one click.

The feature Microsoft forgot...

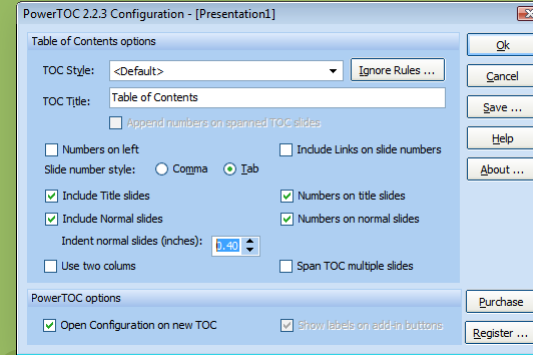

Sometimes, a PowerPoint presentation just will not work without a summary, table of contents or agenda. For those times, PowerTOC you add that critical functionality cleanly and simply to your presentation.

One less thing to worry about.

Completely and correctly modifying a large PowerPoint presentation is already hard enough without having to update it's summary slide. PowerTOC automatically keeps your summary up to date while you modify headlines, bullets, images and slide order as you need to.

You pick, PowerTOC keeps it up to date

With PowerTOC, you choose exactly what you need to summarize, and how that summary should be formatted. Then, PowerTOC automatically keeps your summary up to date regardless of what other parts of your presentation change.

Field	Value	Count
1 Client name	[Client name]	1
2 Client contact	John Morris	1
